

NEFAB CRATEPAK-O

YOUR
PACKAGING
SOLUTION.

NEFAB

A NAILLESS WOODEN CRATE.

→ CratePak-O is a packaging solution made of wood with plastic corners which makes it both strong and easy to work with. The product is shipped flat and no nails are needed to assemble the box. CratePak-O is designed for volumes of up to ten cubic meters and the pallet can be constructed to handle a maximum weight of several tonnes. Being quick and easy to assemble and dismantle without a single nail involved, CratePak-O

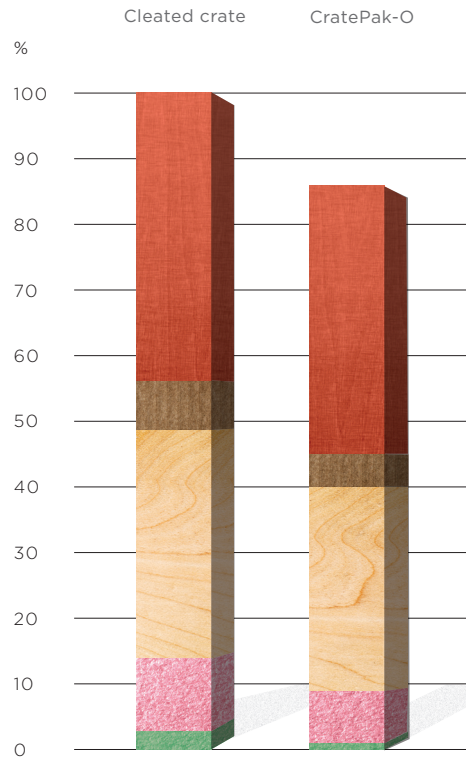

enhances safety, creates a quieter working environment and offers effective packaging for extra-large products. CratePak-O can be opened and closed several times without affecting its performance which makes it more time and cost effective compared to traditional nailed wooden crates. The end result is an easy-to-use packaging that offers great product protection and a safe and quiet working environment.

” The packaging can be dismantled and reassembled multiple times, cutting down on lead times.

”CratePak-O is a great packaging solution for your products, employees and the environment. With CratePak-O you don’t need any nails, the crate can be opened and closed several times and it takes less than a minute to assemble. It’s simply a very strong product that is easy to handle and that offers great product protection.

PONTUS EDING, PRODUCT MANAGER

CRATEPAK-O GIVES SIGNIFICANT SAVINGS COMPARED TO TRADITIONAL CRATES.

TRANSPORT

CratePak-O is delivered flat, meaning significant savings on transport costs can be achieved compared to traditional cleated crates that are delivered erected.

WAREHOUSING

CratePak-O takes up half the volume in storage compared to traditional erected cleated crates.

PRODUCT PROTECTION

The cost of CratePak-O is less than a traditional crate for comparable product protection.

HANDLING

CratePak-O is safer, faster and easier to assemble, and it also saves time when unpacking.

ENVIRONMENT

CratePak-O uses less material than a traditional crate and can be reused several times.

A FLEXIBLE SOLUTION FOR MANY TYPES OF APPLICATIONS

→ CratePak-O is designed to meet the demands of the manufacturing industry and its need for flexible and strong packaging solutions. Vehicles, industry and energy segments are classic examples of sectors that often have huge costs for packing and unpacking.

CratePak-O is an optimal solution for supply chains where the packaging needs to be opened and closed

several times before it reaches its final destination – without using a single nail.

With CratePak-O you get a strong solution that takes less than a minute to assemble without using any nails. It is possible to customize CratePak-O with inner fittings and covers to give your product optimal product protection.

CLOSE-UP: NEFAB CRATEPAK-O

- Quick to assemble and dismantle.
- High safety and a quieter working environment. Tool-free assembly with no nails.
- Space-saving. Delivered and stored as a flatpack.

ABOUT CRATEPAK-O.

1. Easy and fast to assemble. The plastic corners are fastened to the pallet. To assemble the packaging, the four sides are simply slid into place.

2. Ergonomic and safe. Light-weight pallets allow a safe and ergonomic environment. It is also delivered flat.

FOUR REASONS TO CHOOSE CRATEPAK-O

3. Less environmental impact. Compared to a closed wooden crate, less material is needed to build the CratePak-O.

4. CratePak-O is a modular and flexible solution. Inner fittings like wood, foam or cardboard allow the optimal security of the product.

IMPROVING BUSINESS. IN YOUR WORLD

Our **TOTAL COST APPROACH** ensures that packaging is optimized, reducing total cost in your supply chain.

With our **MULTI-MATERIAL ENGINEERING** capabilities, we can develop complete packaging solutions for any product.

In addition, our **GLOBAL SUPPLY & SERVICE** capabilities ensure that we are there to provide local support and global coordination.

Your mission is our mission. We develop complete packaging solutions optimized to reduce total cost and environmental impact in your supply chain. With our global engineering and supply capabilities we serve you in every corner of the world.
