

# CRATEPAK-O HD

# 1. EASY AND FAST TO ASSEMBLE

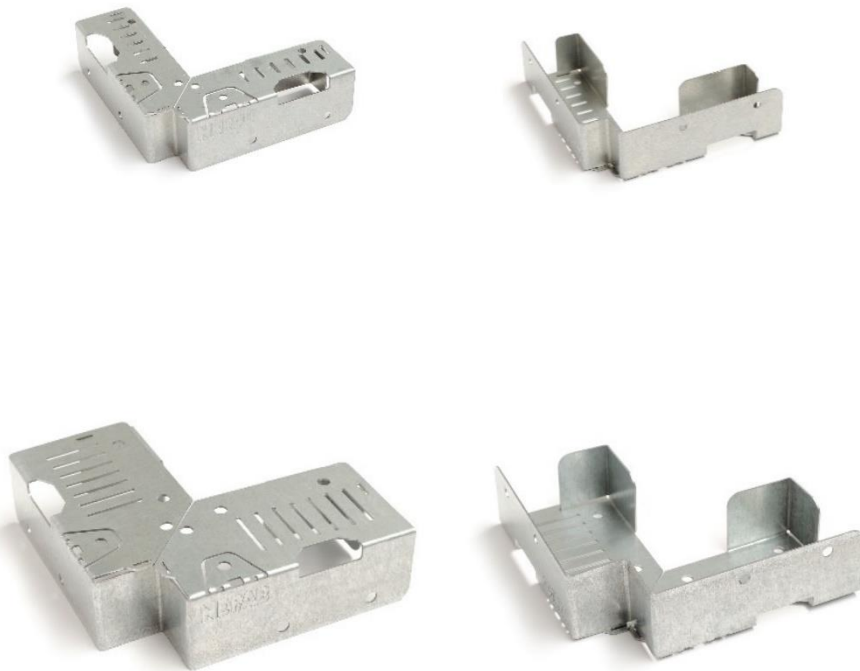

- Wooden crate with metal reinforcements: makes it both strong and easy to work with
- 4 corners are already fastened to the pallet
- To assemble, the sides are just slid into place and closed with 4 top corners and a lid (optional)
- Strapping is applied at the end

## 2. ERGONOMIC AND SAFE

- Saves space as it is delivered flat
- Light-weight panels allow a safe and ergonomic handling
- Crate is assembled quickly and easily, without nails/screws
- Creates a quiet working environment

## 3. STRONG AND FLEXIBLE

- Two sizes 19mm and 38mm
- Compatible with European and US lumber sizes
- The corners feature multiple holes for fastening, but can also be used with strapping and has a specific feature to hold these straps in place.
- Special reinforcements to make the construction even stronger.

## 4. MODULAR AND FLEXIBLE SOLUTION

- Modular fittings: Inner fittings like wood, foam or cardboard allow the optimal security of the product
- Side panels can be used to screen from view and theft e.g. PP, plywood, cardboard
- Can be re-opened and closed several times
- Can be used with most types of pallets
