## Paper Dunnage Bags

### Load-securing

**Nefab supplies strong inflatable dunnage bags for blocking, securing, and protecting loads inside a load-carrier.**

Dunnage bags are the ideal solution to fix, protect, and block loads inside a load carrier thus preventing damages to the goods during transport. Dunnage bags can be used for shipments by road, sea or rail. Some are for one way use, others can be re-used. They are deliverable in many sizes.

An airbag consists of one or more layers of heavy duty kraft paper with a polyethylene innerliner. Dunnage bags can also be made of special BI-oriented plastic. Inflation of the bags is easily done by one person in a matter of seconds with a special airgun.

Main characteristics:

- Efficient, low cost blocking and filling system
- Simple, safe, fast application
- Dynamic system - an airbag adapts its shape to each situation and actively keeps the transit products in place.

In general, dunnage bags provide the following benefits

- Avoid movement of loads inside a load carrier
- Prevent damages to goods in transport
- Reduce risks of accidents
- Reduce claims from haulers

There are different types of airbags available with different characteristics. Nefab provides expertise in selecting the correct product for each application as a part of the Complete Packaging Solutions concept!

Dunnage bags adapt to different shapes of pallet loads.

Dunnage bags prevent damages by blocking goods inside a load carrier.

Dunnage bags can even be used with stacked transport sets.

Dunnage bags can be even used inside a ExPak/RePak.
